

## DESCRIPTION OF THE SESSIONS

Below is all the information about the sessions you will participate in as a researcher. You'll find details on session **types, expected dates, and topics.**

### PARTICIPATIVE & CO-CREATIVE PROCESSES

The starting point for the program is the challenge identified by ecosystem stakeholders and the goal of the program is to find possible ideas for solutions that could tackle this challenge. In this first sessions, participants will work in group dynamics collaborating with stakeholders that have proposed the challenges, in order to better understand their needs and be able to provide a more complete response to the challenge.

### ONLINE TRAINING

The participants will participate in online training sessions to work on the solution for the challenge using Design Thinking and Lean Start up methodologies. Included are the subjects of Knowledge Protection, funding and impact presentations of innovative projects.

### MENTORING

In the timeframe of the program, there participants will have the opportunity for mentoring sessions (up to 5h). The mentor will be a person selected based on the challenge that can provide expert advise in the definition of the solutions and the development and the validation of the ideas. *(To be scheduled between March and June based on the mentors' and the researchers' availability)*

### PROTOTYPING

This timeframe will focus on providing participants help in visual prototyping, project design and presentation of the solution project. It will work similar to mentories. *(To be scheduled between April and June, 5h aprox.)*

### FINAL EVENT

The projects will present their solutions and define the next steps to consolidate them.
